

There's never been a better time to start a retirement plan

ADP is your go-to source for all things payroll, HR, insurance, retirement, and much more. With ADP, you can save time, cut costs, and stay compliant so your business is guaranteed to be on top of anything and everything that's thrown its way.

If you're looking to start offering a retirement plan for your employees, there's never been a better time to start than right now.

Recently, the SECURE Act (Setting Every Community Up for Retirement Enhancement) was passed to help business owners offer their employees a retirement savings plan without the expensive administrative costs that come with it.

Thanks to this act, your business may be eligible to receive up to \$16,500 in tax credits over the next three years. Plus, all eligible employers could receive up to \$5,000 per year for the first three years, all for simply starting a plan. Employers that adopt the automatic enrollment feature also qualify for an additional \$500 credit per year for three years.

All you have to do is offer your employees a retirement savings plan—it's a win-win situation!

Choosing the right retirement plan for your employees can be a daunting task, but you don't have to do it alone. With ADP, you can easily access retirement solutions that are both cost effective and easy to manage. ADP provides:

- Automatic enrollment for eligible employees
- A Save Smart® program that increases savings rates at designated intervals
- Investment management and advisory services

ADP even offers a mobile MyADP app so you and your employees can access your retirement plan virtually anywhere. When it comes to setting up and managing your retirement plan, it doesn't get any easier than using ADP.
